Founded in November 2005 by Kemal Erkan, United Medical has emerged as the largest Health Care Network* in Delaware and the Mid-Atlantic region, serving a nationwide client base of over 27 specialties and 135 practices.

As a Cerner Ambulatory partner, the group operates with a unique objective in mind: to unite providers and patients under one Accountable Care Organization (ACO). Our goal is to streamline processes with individual practices to increase the quality of patient care and to allow more time for each patient. With a local network currently uniting more than 225 providers and 325,000 patients, United Medical is well on its way to changing the health care landscape in Delaware and surrounding communities.
